**Syracuse University Ensley Athletic Center**

**American Buildings Company Supplies Products To Create Impressive Collegiate Athletics Facility**

The Hayner Hoyt Corporation of Syracuse, N.Y. was awarded the [American Buildings Company \(ABC\)](#) 2016 Building of the Year Award for its work on the Syracuse University Ensley Athletic Center building, a 95,149 sq. ft. recreation building with an interior clearance that peaks at 65 ft.

The project overcame many challenges, not the least of which was a grueling and exceptionally cold winter in Central New York. The exterior of the building features a plaza with statues that are homage to Syracuse University legends and iconic #44 jersey bearers Jim Brown, Floyd Little and Ernie Davis.

The highly anticipated Excellence in Design Awards competition is open to all authorized ABC builders and Architectural Metal Systems (AMS) roofers. Winners were selected by an independent panel of judges.

For the 2016 awards, judges chose from 140 entries and selected the best projects in each of the following categories: Agricultural; Auto Dealerships; Church/Religious Center; Commercial; Government/Institutional; Manufacturing/Industrial; Office; Recreation; Retail; Roofing; Special Projects; Transportation; and Warehouse/Distribution. Winners and honorable mentions were announced for each category and eligible to compete for the Excellence in Design top award: 2016 Building of the Year.

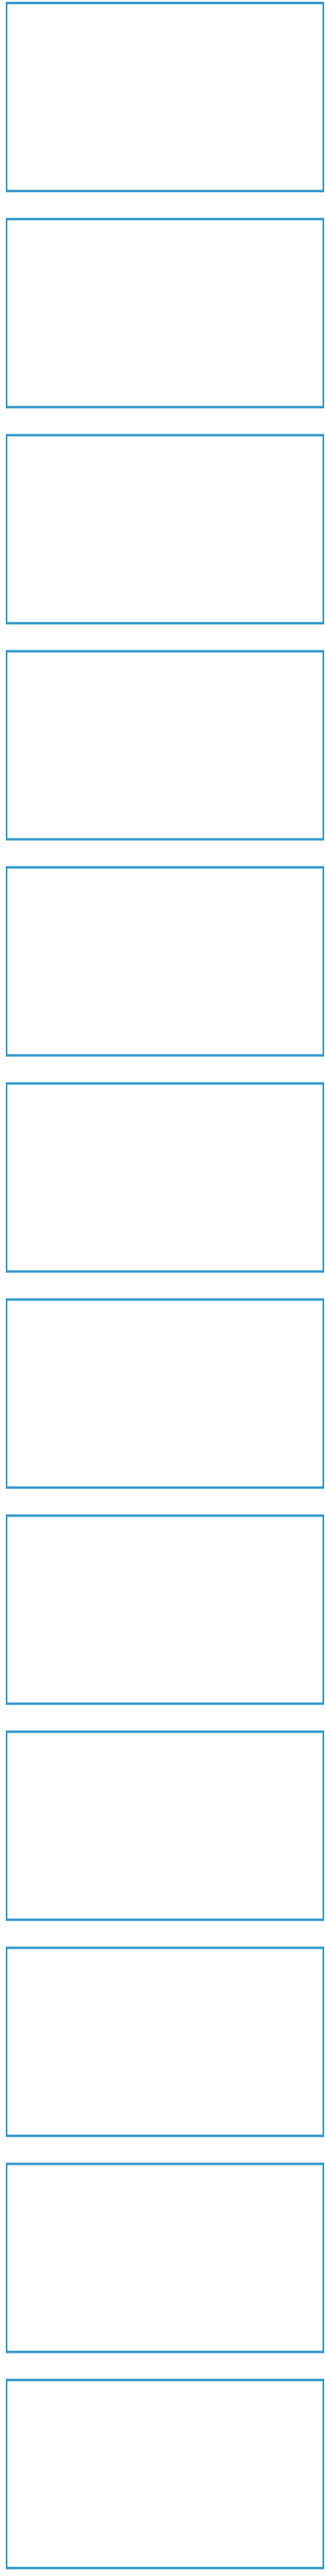

"Each year the Excellence in Design Awards impresses us with projects that showcase innovation in metal systems construction," said Mike George, General Manager of American Buildings' Atlantic Division. "We are honored to work with a remarkable group of roofers and builders."

**About American Buildings Company**

For more than 65 years American Buildings Company has been pioneering the design, manufacture and delivery of metal buildings and roofing systems that set the industry standard. From industrial and commercial structures to tailored projects for the automotive, retail and transportation industries, the ABC family of more than 850 authorized Builders has the expertise to exceed expectations for custom engineered metal building projects in a variety of industry segments. ABC delivers a proven combination of products, technology, and customer service to accurately execute projects on time and on budget

Design And Build With Metal has information on metal roofing (standing seam and batten seam, shake, tile, shingle, corrugated and screw-down roofs); metal wall cladding products (ribbed, smooth faced, insulated metal panels, aluminum composite panels, and curtain walls); metal buildings (pre engineered steel, wood post frame, hangars and self storage); insulation; doors; paint coatings; and many related products (including roof accessories like snow guards, screws and vents). The site covers metal construction products using all types of substrates: steel, copper, aluminum, zinc, stainless steel, Corten, Terne, Galvalume, Zinalume, galvanized, tin and more. Environmental (green) issues, such as sustainability and cool initiatives, are also covered. Project, news and product submissions are welcomed...see information in About Us section
