eQuote Training Video Series

At American Buildings, we are continuously evolving our web application, eQuote, to help our Builders easily price more projects. In order for our Builders to gain a firm understanding of eQuote and its many options, we've developed a library of training videos that you can watch at your own pace.

This month we're highlighting **Building Load Requirements**. The Building Load Requirements screen is where you define the loads that apply to individual building parts. Building Code and Loads have significant impact on price, so it's important to be as accurate as possible with this information.
